The screenshot displays the Visual Studio Code interface with a Go file named `act1.go` open. The code is a simple program that prompts the user for a student's name, age, and ID, and then prints the collected information.

```
1 package main
2
3 import "fmt"
4
5 func main() {
6     fmt.Println("Masukkan nama mahasiswa: ")
7     var namaMahasiswa string
8     fmt.Scanln(&namaMahasiswa)
9
10    fmt.Println("Masukkan umur Mahasiswa: ")
11    var UmurMahasiswa int
12    fmt.Scanln(&UmurMahasiswa)
13
14    fmt.Println("Masukkan ID mahasiswa : ")
15    var idMahasiswa string
16    fmt.Scanln(&idMahasiswa)
17
18    fmt.Println("\nInformasi Mahasiswa:")
19    fmt.Println("Nama:", namaMahasiswa)
20    fmt.Println("umur:", UmurMahasiswa)
21    fmt.Println("ID Mahasiswa:", idMahasiswa)
22 }
23
```

The terminal output shows the program's execution with the following input and output:

```
achmadfadli@achmadfadli-Lenovo-V14-G2-ITL:~/Documents/Lab1/belajargolang$ go run act1.go
Masukkan nama mahasiswa: fadli
Masukkan umur Mahasiswa:
20
Masukkan ID mahasiswa : 50422069

Informasi Mahasiswa:
Nama fadli
umur 20
ID Mahasiswa: 50422069
```

The status bar at the bottom indicates the file is at line 22, column 2, with a tab size of 4, UTF-8 encoding, and LF line endings. A message in the status bar states: "Error loading workspace: packages.Load error: err: exit status 1: stderr: go: no modules were found in the current workspace; see 'go mod init'".
